

Please amend claim 32 as follows.

32. (Currently Amended) The device of claim 1, wherein ~~and wherein~~ the actuator member and the input member are interconnected via a threaded connection such that rotation of the input member causes axial movement of the actuator member that imparts movement to the engagement member for moving the engagement member between the operative and release positions.

REMARKS

The above amendments are made to correct minor matters of language, and do not affect the scope of the claims.

Entry of this amendment is respectfully requested.

Respectfully submitted,

By
